N^o10 TWIN - FLUORIDE REMOVAL AND GENERAL PURPOSE WATER FILTER SYSTEM

No. 10 Twin AF600 - BC600 Installation

System Overview

Pozzani have combined a fluoride removal cartridge - AF600, with a general purpose cartridge - BC600 to achieve efficient fluoride reduction together with the reduction of chlorine, dissolved organics, heavy metals and a wide range of other pollutants.

This combination of cartridges makes our twin system one of the most cost effective methods of achieving efficient fluoride reduction and reducing many other unhealthy and unpleasant tasting chemicals and metals.

Cartridges and Performance

AF600 Contains a new media with a special coating that removes up to 4 times the amount of fluoride compared to competitors cartridges with no coating. This cartridge also removes arsenic. We believe this cartridge to be one of the most efficient fluoride reduction cartridges available.

BC600 This is a broad spectrum carbon based cartridge which removes chlorine, fluoride, heavy metals, oestrogens, dissolved organics etc. Dirt and suspended solids are removed down to 5 microns.

Choice of Tap - See pictures at bottom of page

Easy Installation - See picture opposite

Technical Data

Dimensions	350mm (H) 270mm (W) 110mm (D)
Max. Input Pressure	7 bar - 100 psi
Max. Flow Rate	3 litres/min
Cartridge Change	AF600 - On exhaustion or 6 months BC600 - 6 months
