FILTERS FOR REFRIGERATORS WITH WATER DISPENSERS

So called "American Style" refrigerators that have integral cold water dispensers usually have a water filter on the water supply to the fridge to clean and improve the taste of the water.

Fridge water filters are either EXTERNAL - which are fitted outside of the refrigerator or INTERNAL - these are built into the fridge and are normally specifically designed for that model (forcing you to buy only the manufacturers original filter).

Fridge filters should normally be changed every 6 months (some Amana, Jenn-Air and Maytag models claim a longer life). DO NOT USE A FILTER CARTRIDGE beyond its recommended life - it may harbour bacteria.

INSTALLING A NEW FRIDGE OR UPDATING YOUR EXISTING FRIDGE FILTER

If you are installing a new fridge or want to update your existing fridge filter cartridge, see the guide overleaf on filtration options including how to get clear ice-cubes in hard water area.

REPLACING AN EXISTING CARTRIDGE

The chart below will help you identify which filter type you have.

EXTERNAL	INTERNAL
LG Samsung Amana -wpro Hotpoint Kupperbusch Atag - Early models	Amona - Clean n' Clear GE Jenn-Air Maytag Whirlpool Atag - Later models

EXTERNAL CARTRIDGES

Replace with Universal fridge filter cartridges.

Measure OUTSIDE diameter of tube. Standard is 1/4" OD (6.4mm) - If your tube is not 1/4" OD please call for advice.

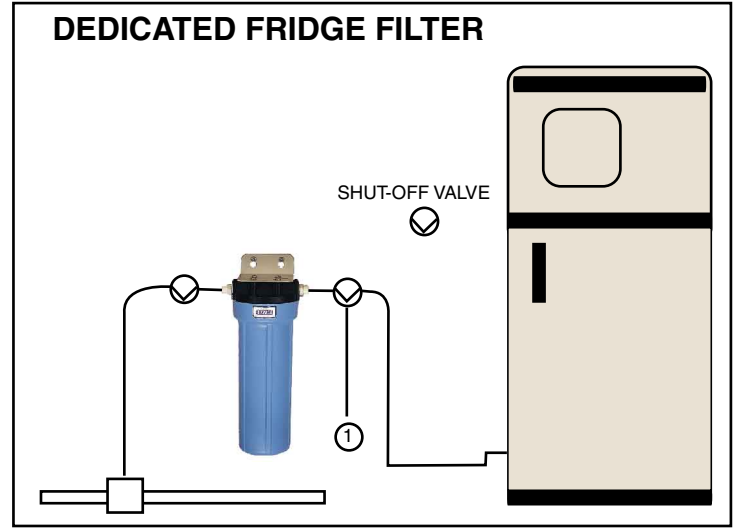

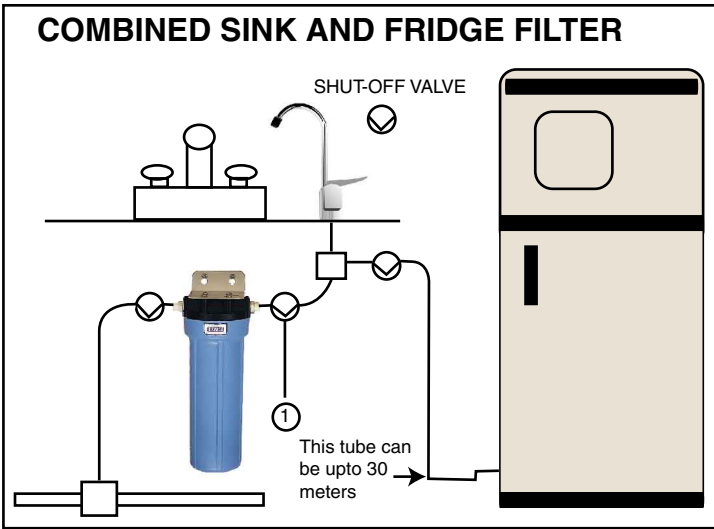

Price £15.00 (inc. VAT & Postage).

INTERNAL CARTRIDGES

See enclosed price list.

New Installations and Fridge Filter Upgrades

Firstly consider if you can combine the functions of the filter system to supply a sink-tap as well as the refrigerator, you can then filter the water for hot drinks - to do this you will need access to run a small bore tube (1/4" outside diameter) from the sink to the fridge (doorways etc. can cause problems) SEE DIAGRAM BELOW.

① = Drain off point to flush new cartridges

Single Filters

System Price £45.00
Replacement Cartridge £12.75

System Price £55.00
Replacement Cartridge £15.95

Twin Filter

Install in hard water areas where clear ice-cubes and scumless hot drinks are required.

System Price £85.00
Replacement Cartridges £31.90

THE ABOVE SYSTEMS CAN BE ALSO "HARD PLUMBED" IN 15MM AND 22MM COPPER OR PLASTIC TUBE (not IX250). Please state hard plumbed when ordering.

FITTING KITS

Saddle Valve (with 1 meter of tube)	£10.00
Sink-Top Tap with Tube and Tee Connector (State Colour and Reach)	£15.00
As above with stainless steel tap (State Reach)	£25.00
Extra tube	£0.50/meter
