

CT600 ANTI SCALE SYSTEM

The main benefits of the CT600 system are listed below

- Protects combination boilers
- Greatly reduces scale in hot water cylinders and boilers
- Appliances last longer and work more efficiently
- Calcium and rust staining on sinks, taps, showers etc is greatly reduced
- Greatly reduced corrosion
- Reduces erosion of copper pipework in acidic water
- Significantly lowers fuel costs as heating elements are not coated in thick layers of scale
- Eliminates the 'nuisance value' of arranging repairs & being without your appliance when it stops

System Overview

The CT600 is a combined filter system and scale reduction system - it also reduces corrosion and dissolution of pipework in acidic waters.

Maintenance is easy and economic, simply replace the cartridge every six months, registered customers are sent a reminder. There are no messy pastes to mix or cartridges to refill.

TECHNICAL SPECIFICATIONS

Dimensions	Overall height 330mm/Width 160mm
Port Sizes	1/2" BSP or 3/4" BSP
Max Pressure	150 psi
Max Feed Temp	40C
Estimated Capacity	250,000 litres
Life Duration	At least 6 months - depending on local conditions
Filtration	5 micron

PRICE

CT600 System & Cartridge	£47.50 + £5.00 P&P + VAT
CT600 Cartridge	£13.57 + VAT

State size of connecting ports e.g. 1/2" BSP (15mm Compression), 3/4" BSP, other sizes from 6mm - 22mm available.
