UPGRADE EXISTING SYSTEM TO REMOVE SCALE AND SCUM

Overview

You can upgrade any drinking water filter system by installing our No.10 HM600 scum & scale unit as a pre-filter to your existing system.

The benefits of doing this include

- Stop scum forming on hot drinks
- Kettles stay free of limescale
- Ice cubes will be clear rather than cloudy

Installation

Installation is simple. The system is supplied with a standard installation kit for 1/4" OD tube. If you let us know the details of your existing filter system we can help with a custom connection kit so the system can be fitted with the minimum of effort (any additional parts will have a small charge).

The No.10 - HM600 system must be fitted upstream of the existing carbon cartridge (which must be retained) - see diagram below which covers fridge as well as point-of-use tap applications.

INSTALLING THE NO.10 HM600 HOUSING TO AN EXISTING WATER FILTRATION SYSTEM

Dimensions of No.10 - HM600 housing:
 Height (including bracket) approx 330mm x
 Width 160mm
 Maximum water pressure: 95psi (6.5 bar)

Running Costs

The HM600 cartridge works by ion exchange, the exchange ion being Hydrogen (harmless). The cartridge exhausts in direct proportion to the temporary hardness in the water and the amount of water used, if the system is used sparingly typical cartridge life is 4 - 6 months. Where heavy use necessitates earlier cartridge changes, running cost can be reduced by buying the cartridge in multiples.

Prices (VAT included in all prices on this page)

No 10 - HM600 System	£37.50
Extras	
Saddle Valve (with 1 meter of tube)	£13.97
Sink-Top Tap with Tube and Tee Connector (State Colour and Reach)	£20.85
As above with stainless steel tap (State Reach)	£31.85
Extra tubing	£0.80/meter

Carriage is extra on above prices
