

SFL25-5-13OBE

Spa Filter

The FilterLogic™ spa filter range has been designed to offer an economical and energy efficient alternative to your spa manufacturer's original replacements. Well maintained filtration in hot tubs is essential to ensure suspended dirt and debris doesn't cause damage to the spa's integral pump and heating system, it can also help prevent the build up of sludge in the internal pipework that can potentially lead to microbiological contamination. Precipitated iron, calcium, body oils, lotions and dirt are also captured and removed by the filter.

The high-flow moulded core of the filter reduces the load on the integral pump thereby maximising the life of the spa and ensuring optimal performance.

The filter lasts for up to 6 months. It is recommended that you rotate filter sets every two weeks.

Alternative filter for the models below:

- > Darly 42513
- > Filbur FC-2375
- > Pleatco PRB25-IN
- > Unicl C-4326

Benefits

- > Energy efficient and very cost effective
- > Simple to install and change
- > Designed in the UK
- > Effective removal of harmful contaminants
- > Filters to fit over 70 models of hot tub
- > Range of compatible hot tub disinfectants available

Specifications

Surface Area	2.32m ²	25ft ²
