"BIG BLUE" - 10" AND 20" FILTER HOUSING

HOUSINGS

BIG BLUE FILTER HOUSINGS

Big Blue filters are cartridge based filters designed for industrial applications and higher flowrates. These robust housings are available in 2 sizes, the small one taking standard 10" cartridges and the larger one taking 20" cartridges.

Connection ports for both housings are available with 1" or 1 1/2" BSP threads.

A wide range of cartridges are available for both sizes of housing, the widely used cartridges are listed below, if you require a specialist cartridge call our technical helpline on 01507 608100.

IMPORTANT:

Maximum operating pressure rating is 95psi, we recommend the fitting of a pressure regulator if feed pressure is expected to exceed 90psi.

Ambient temperature operating range is 5°C to 40°C. Protect housing from cold, frost and excess heat.
